About

BGS CyberOps is the cybersecurity and IT engineering practice of Belief Global Solutions, LLC — a New York-registered small business supporting DoD primes, federal agencies, and cleared programs. We deliver cleared engineering with the operational tempo missions demand and the compliance evidence primes require.

Core Competencies

● Cybersecurity Operations

SOC augmentation, incident response, threat hunting, and vulnerability management aligned to NIST 800-171, CMMC 2.0, and DoD RMF.

● Infrastructure & Systems

Data center modernization, cloud migration (AWS GovCloud, Azure Gov), virtualization, and platform engineering with compliance guardrails.

● CMMC Advisory

CMMC 2.0 readiness assessments, SSP and POA&M authoring, evidence collection, and C3PAO assessment coordination.

● Network Engineering

Enterprise WAN design, SD-WAN transitions, zero trust architecture, firewall management, and secure connectivity.

● Mission IT Support

Tier 2/3 systems administration, endpoint hardening (STIG), 24/7 NOC operations, and mission systems steady-state.

● Global Mission Support

OCONUS-experienced staff supporting programs across EMEA, INDOPACOM, and CENTCOM with ITAR/EAR awareness.

Why BGS CyberOps

SAM.gov Ready

Active federal registration, TIN-validated, CAGE-assigned. Ready to be added to your teaming agreement before the next proposal deadline.

Delivery, Not Handoff

Our engineers do the work. No layered subcontracting, no offshore surprises. Direct accountability to your program manager.

Compliance-Native

NIST 800-171 controls implemented in our own operations. SSP, POA&M, and evidence artifacts available as reference.

Cleared & Clearable

Access to cleared talent for classified programs plus a fast bench for public trust and secret-level work.

Selected Past Performance

Full customer names, contract numbers, and points of contact available under NDA on request.

Enterprise Network Engineering

DoD Prime Subcontract · Cleared IT engineering, CONUS + OCONUS

ROLE · SUBCONTRACTOR NAICS · 541512 PERIOD · ON REQUEST

Network engineering support to a Department of Defense prime, spanning enterprise WAN architecture, secure connectivity engineering, and mission systems integration across CONUS operations centers and OCONUS forward locations.

Cybersecurity Operations Support

Federal Enterprise · SOC augmentation & compliance evidence

ROLE · SUBCONTRACTOR NAICS · 541519 PERIOD · ON REQUEST

SIEM tuning, incident triage, and compliance evidence collection aligned to NIST 800-171 and the DoD Risk Management Framework. Delivered artifacts consumed by the prime's ATO package.

Infrastructure Modernization

Commercial Enterprise · Data center to cloud migration

ROLE · PRIME NAICS · 541511 PERIOD · ON REQUEST

Data center modernization and multi-cloud migration engagement including landing zone design, workload migration, identity federation, and post-migration operational handoff.

Certifications & Compliance Posture

- NIST 800-171 controls implemented in own operations
- CMMC 2.0 Level 2 readiness posture
- Section 508 & WCAG 2.1 AA aligned
- Responsible disclosure policy published (security.txt)
- ITAR / EAR awareness for cross-border engagements
